Seating upholstery: Theory Aspen

Simply content.

Energy's trim, contoured profile is the secret to its superior comfort. Specify it with or without arms, and in matching or contrasting seat and back upholstery. Whatever you choose, Energy will look and feel just right.

Looking good.

Energy's classic looks will appeal to your sense of style. It can be specified in a broad selection of Allsteel seating upholstery, fully tailored for aesthetic refinement. There's plenty of room for self-expression. Most importantly, you'll like how it looks.

Feeling great.

Energy is task-oriented, like you. Its fully adjustable, pivoting arms and adjustable-height back ensure you're in position to get things done. A 2:1 back-to-seat ratio keeps you in optimal ergonomic posture and enhances your circulation. There's also a synchro-tilt mechanism for smooth, responsive reclining. Energy at work means energy to work.

Energy's contoured back is shaped like yours. Tall, short, or in-between, its seven-position, three-inch height adjustment range supports every spine.

Specify Energy with adjustable-height, pivoting arms for worksurface tasks or without arms to adapt to any space. Also available with fixed arms for conference rooms.

Easy does it.

This is Energy. It's easy to specify and easy to use. And with simple, clean lines, it's easy on the eyes. Have a seat, and you'll discover the advantage of passive ergonomics, intuitive controls, and a comfortably contoured back that fits every user. All this adds up to total seating satisfaction.

Energy

Statement of Line

Mid-back–Arms

Respecting the environment.

At Allsteel, we help our business partners achieve a positive environmental impact and understand that environmental consciousness can be gainful. This means ensuring that all materials balance performance and sustainability. Strong, high-quality products guarantee years of use and re-manufacturability.
