

Allsteel®

Landscape™
Surfaces
and More

How inspiration takes shape.

Innovation begins with inspiration. Our unique textiles, finishes, and Landscape surfaces can be the source or expression of your creativity, giving form to your imagination. Mix and match, combine and contrast. Wood, metal, fabric, fibers, glass, acrylics, and more allow you to design office spaces that demonstrate your vision and your mission, your good taste and good sense.

Insert vision here.

Consider our seating, storage, and panel systems as the framework for your creativity. You can accent the look of Landscape surfaces with other materials and colors that make you say ooh, ahh, aha, or wow. Bring us your own fabric and we'll test it for use on seating or panels. And, our Terrace® system can accept almost any custom tile material. When you create an environment from the things that spark your imagination, chances are it will keep the inspiration coming.

Change your mind, change your space.

Change your office with the times or the company you keep. You can replace some or all of your Terrace tiles with Landscape surfaces or any of our other materials to get a bit of texture, a pop of color, or create a whole new vibe. Redress your office without dismantling your budget.

BENCHMARK PALETTES

Pearlescent Strata and Frequency

From a button manufacturer, we offer innovative, 100% recyclable polyester resin with tone-on-tone patterning. Exclusive and semi-opaque, Pearlescent Strata™ and Frequency™ feature wisps and drifts of subtly layered neutral colors.

Foundation and Mulberry Paper

Foundation™ gives neutrals a bit of semi-translucent sparkle by suspending fabric between 100% recyclable PETG resin sheets that let the light through. Mulberry Paper, made from dyed and variegated natural fibers, is sandwiched between PETG resin sheets to bring a bit of the outdoors inside.

 Beautiful materials are even better when they're also recyclable. PETG resins can easily be recycled as part of the PET stream. PET is the primary raw material used to make plastic drink bottles and is one of the most developed recycle streams in North America.

and shine

LUMAsite and Infinite Spectrum

Fiberglass within acrylic provides strength and texture to not-quite-opaque LUMAsite®. Infinite Spectrum™ allows for perfect coordination among interior elements. A unique partnership with Pantone, Inc. means we can put any of the colors in the new PANTONE® for architecture and interiors color system or PANTONE MATCHING SYSTEM® on Terrace tiles.

Once you're through with your Pearlescent Strata, Frequency, and Infinite Spectrum tiles, we'll take them back. Our helpful button-maker partners will grind them up and return the raw material to the resource stream.

Wood, Glass, and Tech Metal

We offer Natural and Cleargrain™ veneer from Gunlocke® in Natural Maple to Espresso, with Medium Cherry, Cinnamon, and a range of other colors in between. The durable ClearTech® finishing process on wood worksurfaces makes for easy cleanup of office oops. Glass comes clear, tumbled to a frost, or tinted for cool sophistication. Metals are mesh, smooth, slotted to hold work tools, painted to whisper or shout, or brushed with overlapping strokes for a high-touch twist on high-tech.

Fabrics and Upholsteries

Our standard offering is anything but. Coverings for panels and seating are easy-care, highly touchable, and durable enough to stand up to sustained use. Several of our textiles have recycled content and are recyclable. Plus, we offer many Terratex® fabrics for seating and panels made from 100% recycled polyester.

Paints and Laminates

Let functional items express themselves with our baked-enamel paint finishes. Mica colors sparkle, Core colors speak softly, and the full saturation of Attitude colors makes you stand up and take notice. Mix, match, or contrast moods with the warmth of woodgrain, confetti fun, subtle neutrals, solid colors, or the soft shimmer of pearlescent laminate finishes for worksurfaces.

 Terratex-classified fabrics and upholsteries are made from 100% recycled materials. This means they're recyclable or compostable and use less virgin polyesters. Choosing Terratex contributes to a cleaner environment.

CUSTOM PALETTES

Customer's Own Material

If you're looking for something even more extraordinary, we can help you find materials—grasses floating in clear acrylic, glimmery wovens, leather that breathes—that give definition to the various faces of cool. Many have already been tested and approved for use. Or bring us what you've found for panel fabric, seating upholstery, paints, and laminates. And Terrace works with almost any material you can think of.

Because we've already made environmentally responsible choices, it's easier for you to do the same when selecting custom materials. Manufacturing something from recycled materials uses only 25% of the energy it takes to make something new and reduces pollution by as much as 75%. Wise choices lead to better living.
